

Having problems developing a simple solution for secure B2B transactions?

Neudesic can help you overcome your complex integration challenges by implementing a cloud-based or traditional on-premises B2B/EDI solution that will make it easy to:

- Stand-up on-premises infrastructure to connect with partners
- Support complex standards and protocols such as AS2/X12, EDIFACT, HIPPA/HL7, SWIFT and RosettaNet
- Manage multiple trading partners and agreements

BizTalk Server delivers secure, reliable messaging over the Internet while also providing for easy management of multiple partners and agreements. Cloud-based Windows Azure BizTalk Services (WABS) connect securely to your on-premises LOB systems to enable B2B transactions and partner management without the need for an on-premises integration server.

Leveraging these proven technologies, Neudesic will work with you to develop a proof-of-concept (POC) solution customized to your specific needs.

SCHEDULE YOUR ENGAGEMENT TODAY:
 2-3 WEEKS OR 80-120 HOURS • Call for special pricing.

Neudesic can help you get integrated. To learn more about our products and services, call (800) 805-1805, or visit our website at www.neudesic.com.

Our Proven 4-Step Proof-of-Concept Process

01 NEEDS ANALYSIS

We interview key technical and executive stakeholders to select one B2B scenario to implement as part of a POC solution based on your choice of BizTalk Server, Windows Azure BizTalk Services, or a combination of both.

02 DESIGN

After identifying components needed to implement the solution, we map the product features to use for integrating with your business partner. The design includes setting up a trading partner in the system, as well as management and monitoring capabilities.

03 DEVELOPMENT

We configure the infrastructure to meet your needs. If you have an existing implementation, we migrate it to your chosen solution. Your POC will be a partner integration that integrates with one of your LOB systems. Needed format conversions are included.

04 DOCUMENTATION

Your engagement isn't complete until we provide you with:

- Vision, scope and requirements documents
- Requisite system design specifications
- A POC that showcases an EDI transaction with a partner
- An outline of engagement specifics and recommendations
